Hiring Manager
Jarvis Consulting Group

Dear Hiring Manager,

I am writing to express my strong interest in the **Junior Data Engineer/Developer (Trainees)** position at **Jarvis Consulting Group**. With my background in Computer Engineering and specialization in AI and Data Science, I am excited about the opportunity to contribute to your team's data-driven initiatives.

My background combines strong technical skills in Python, SQL, and Power BI with hands-on experience automating data workflows and building predictive models. At Moah Appliances, I directed the development of Power BI dashboards that improved executive visibility by 40%, and automated reporting processes that saved 15+ hours weekly. I am eager to bring this same impact to your team.

I would welcome the opportunity to discuss how my background in data analytics and automation can support Jarvis Consulting Group's objectives. Thank you for considering my application. I look forward to the possibility of contributing to your team's success.

Sincerely,

Vrajesh Bhatt
