Hiring Manager

HelloFresh

[Company Address]

Dear Hiring Manager,

I am writing to express my interest in the **Data Analyst, Growth** position at **HelloFresh**, which I discovered via Brave Search. With my background in Computer Engineering and specialized training in AI/Data Science, I am confident in my ability to contribute to your team.

My experience aligns closely with your requirements:

- Advanced SQL skills with experience in BI and self-service analytics tools (Tableau, Looker, Power BI), aligning with data visualization requirements.
- Strong understanding of marketing analytics concepts, including performance measurement, budget tracking, and ROI analysis.
- Proficiency in Python for analysis and modeling, as demonstrated through forecasting projects.
- Experience combining data from multiple sources to create unified, analytics-ready datasets, supporting data integration needs.

At Moah Appliances, I developed automated data collection pipelines using n8n, reducing manual reporting time by 60%. I also created interactive Power BI dashboards used by management for sales and inventory decisions. My projects include an Airline Performance Analysis Dashboard and a Retail Sales Forecasting Model with 87% accuracy.

I am particularly excited about **HelloFresh**'s work in data analytics. My technical stack—Python, Power BI, RPA, and SQL—matches the skills you seek, and I am eager to apply my analytical mindset to solve real-world data challenges.

I have attached my resume and a tailored cover letter for your review. I welcome the opportunity to discuss how I can contribute to **HelloFresh** and look forward to hearing from you.

Sincerely,

Vrajesh Bhatt
