Hiring Manager

CGI

[Company Address]

Dear Hiring Manager,

I am writing to express my interest in the **Data Analyst** position at **CGI**, which I discovered via Brave Search. With my background in Computer Engineering and specialized training in AI/Data Science, I am confident in my ability to contribute to your team.

My experience aligns closely with your requirements:

- Proven Python expertise: developed forecasting model using pandas and scikit-learn; used Python for data manipulation and analysis.
- Demonstrated ETL and automation capabilities: built automated data collection pipelines with n8n, reducing manual effort by 60%.
- Skilled in Power BI dashboard development and data visualization, with ability to quickly learn Tableau.
- Strong SQL skills and experience integrating diverse data sources (APIs, CSV) into unified datasets.

At Moah Appliances, I developed automated data collection pipelines using n8n, reducing manual reporting time by 60%. I also created interactive Power BI dashboards used by management for sales and inventory decisions. My projects include an Airline Performance Analysis Dashboard and a Retail Sales Forecasting Model with 87% accuracy.

I am particularly excited about **CGI**'s work in data analytics. My technical stack—Python, Power BI, RPA, and SQL—matches the skills you seek, and I am eager to apply my analytical mindset to solve real-world data challenges.

I have attached my resume and a tailored cover letter for your review. I welcome the opportunity to discuss how I can contribute to **CGI** and look forward to hearing from you.

Sincerely,

Vrajesh Bhatt
